❌	Sitemap XML	Manquant Votre site web ne dispose pas d'une sitemap XML, ce qui peut poser problème. La sitemap recense les URLs que les moteurs de recherche peuvent indexer, tout en proposant d'éventuelles informations supplémentaires (comme la date de dernière mise à jour, la fréquence des changements, ainsi que leur niveau d'importance). Ceci permet aux moteurs de recherche de parcourir le site de façon plus efficace.

		Un outil de mesure d'audience vous permet d'analyser l'activité des visiteurs sur votre site. Vous devriez installer au moins un outil Analytics. Il est souvent utile d'en rajouter un second, afin de confirmer les résultats du premier.
